

PASSIVE FIRE PROTECTION PRODUCTS AND PROTECTIVE COATINGS

Our Business is making
sure you stay in business.

CHARCOAT

INTRODUCTION

CharCoat Passive Fire Protection was formed over 20 years ago in Australia for the then emerging Cable Coating and firestopping Market.

Specializing in protective coatings and firestop products. We positioned ourselves as an advance technology company focused on the protection of electrical cables, eventually branching out to encompass Electrical Insulators, Thin Film Insulation and Structural Steel Fire Protection, with other protective coatings always under development.

We have now far surpassed our competitors, creating one of the most Superior Cable Coatings (CharCoat CC) on the market today rated to 1100°C for 90 minutes, QUV and Radiant approvals and marine approvals pending. Coupled with our 4 hour Firestopping Range and capability to produce or procure any product, we have become one of the leading brands in the market today.

Our mission at CharCoat Passive Fire Protection is to manufacture and supply our clients with the most technologically advanced coatings and firestopping products for the protection against fire. By securing our client's assets and safeguarding the functionality of their facilities, we aim to assist with their financial goals without the burden of fire, downtime, loss of revenue and insurance costs.

OUR PASSIVE FIRE PROTECTION PRODUCTS ARE USED IN THE FOLLOWING SECTORS

INDUSTRIAL

Power Plants & Substations
Petrochemical (Oil & Gas)
Mines
Smelters
Process Industries
Warehousing

INSTITUTIONAL

Hospitals
Public Buildings
Airports

OFFSHORE & MARINE

Platforms
Shipping
FSO & FPSO
Harbours & Ports

RESIDENTIAL

Apartments
Condominiums
High-rise Buildings
Low-rise Buildings

COMMERCIAL

High-rise Offices
Hotels
Shopping Centers
Entertainment Centers
Resorts

WE ALSO SUPPLIES THE FOLLOWING SERVICES TO SUPPORT OUR PRODUCTS:

- : Estimation Services (BOQ Only)
- : Project Pre-Inspection
- : Project Management
- : Supervision
- : PFP Applicators (sprayers)
- : PFP Applicators and Equipment / Equipment technicians
- : QA / ITP (Inspection and Test Plan)

OUR PRODUCTS

CharCoat CC

A ninety (90) minute IEC, ASTM, UL Approved Hydrocarbon Fire Rated Coating for the protection of electrical cables.

CharCoat 1709

CharCoat 1709 is our 5 hour Fire Rated Epoxy Intumescent Coating for the protection of Structural Steel in hydrocarbon environments. Tested and approved to UL1709. This is an ideal solution for Steel Fire Protection within the petrochemical industry.

CharCoat JF

Is our revolutionary new Hydrocarbon Jet Fire Rated Coating which is a 2 component 100% epoxy based intumescent, 100% solvents free. Suitable for the protection of steel, aluminium or composites from Cellulosic to Hydrocarbon Pool and Jet Fires.

CharCoat SC

CharCoat SC is a 2 hour Fire Rated Thin Film Intumescent Coatings for the protection of Structural Steel. Tested and approved to BS476, Part 21 and UL263. This is an ideal solution for Steel Fire Protection.

CharCoat CTI

An all new Ceramic Thermal Insulation Coating that is sprayed direct to the substrate to provide superior insulation. Whether it be piping, tanks, transport, roofing or walls.

CharCoat IC

A unique room temperature RTV Silicone applied to ceramic Insulators to prevent pollution flashovers of High Voltage Insulation.

CharCoat Firestopping

Our four (4) hour fire and insulation rated firestop products including IS Sealant, FP Panel and FM Mortar. Used in combination to establish a unique fire rated system in the PFP market place.

Disclaimer: The above data, particularly the recommendations for the application and use of CharCoat Passive Fire Protection products are based on the manufacturer's knowledge and experience. Due to different materials and conditions of application, which are beyond our control, we recommend in any case to carry out sufficient tests in order to ensure that CharCoat Passive Fire Protection products are suitable for the intended purpose and applications. Therefore, any liability for such recommendations or any oral advice is expressly excluded unless we have acted willfully or by gross negligence. It is always the responsibility of the installer / purchaser to guarantee correct preparation, DFT (CharCoat Coatings) and thickness (CharCoat Firestop Products) of all CharCoat Passive Fire Protection products. CharCoat Passive Fire Protection is not liable for installation or faulty installation. It is always the responsibility of the installer / purchaser to guarantee and certify the installation of materials.
